Volume 132 1983

Table of Contents

No. 1 1–218 issued on April 15, 1983
No. 2 219–450 issued on May 2, 1983
No. 3 451–694 issued on May 16, 1983

Corrections 693

Nucleic Acids, Protein Synthesis, and Molecular Genetics

B-Z Transition in Methylated DNA. A Quantum-Chemical Study
J. J. C. Van Lier, M. T. Smits, and H. M. Buck 55–62

Comparison of the Physical Maps and Redundant Ends of the Chromosomes of Phages 2C, SP01, SP82 and φe
P. Hoet, M. Coene, and C. Cocito 63–67

Physical Map of Phage 2C DNA: Evidence for the Existence of Large Redundant Ends
M. Coene, P. Hoet, and C. Cocito 69–75

Analogues and Analogue Inhibitors of $ppp(A2'p)_nA$. Their Stability and Biological Activity
M. C. Haugh, P. J. Cayley, H. T. Serafinowska, D. G. Norman, C. B. Reese, and I. M. Kerr 77–84

Proteins of the 30-S Subunit of *Escherichia coli* Ribosomes which Interact Directly with Natural mRNA
N. E. Broude, K. S. Kussova, N. I. Medvedeva, and E. I. Budowsky 139–145

Spin-Label Study of Histone H1-DNA Interaction. Involvement of the Central Part of the Molecule in Reconstituted Chromatin
J.-L. Girardet and J.-J. Lawrence 195–200

Mitochondrial Polypeptide Elongation Factor EF-Tu of *Saccharomyces cerevisiae*. Functional and Structural Homologies to *Escherichia coli* EF-Tu
B. Piechulla and H. Küntzel 235–240

NMR Study of the Interaction between the *lac* Repressor and the *lac* Operator
F. Buck, K.-D. Hahn, W. Zemann, H. Rüterjans, J. R. Sadler, K. Beyreuther, R. Kaptein, R. Scheek, and W. E. Hull 321–327

Isolation of Early Viral Proteins from Poxvirus-Infected Chick Embryo Fibroblasts by DNA-Cellulose Chromatography and Inhibition of Their Synthesis by Chicken Interferon
J. Rösel and C. Jungwirth 361–367

Unbalanced Ribosomal Protein Synthesis in a Strain of *Escherichia coli* Containing a Cloned, Truncated 16-S Ribosomal RNA Gene
P. G. H. Barnsley and B. H. Sells 389–394

Gamma-Ray Induction of Deoxyribonucleic Acid Synthesis in Temperature-Sensitive DNA Initiation Mutants of *Escherichia coli*
M. Kohiyama, H. Eberle, and D. Sporn 411–415

Ribosomal Proteins Cross-Linked to 28-S and 18-S rRNA Separated by Sedimentation After Ultraviolet Irradiation of Rat-Liver Ribosomes
T. Uchiumi, K. Terao, and K. Ogata 495–499

Interaction of $tRNA^{Phe}$ and $tRNA^{Val}$ with Aminoacyl-tRNA Synthetases. A Chemical Modification Study
V. V. Vlassov, D. Kern, P. Romby, R. Giegé, and J.-P. Ebel 537–544

Photoaffinity Labeling of Chloroplastic and Cytoplasmic Leucyl-tRNA Synthetases of *Euglena gracilis* by the γ-(*p*-Azidoanilidate) of ATP
R. Krauspe and O. I. Lavrik 545–550

Subcellular Distribution in *Xenopus laevis* Oocytes of a Microinjected Poly(A)-Binding Protein from *Artemia salina* Gastrulae
E. De Herdt, G. Marbaix, R. Tencer, and H. Slegers 623–627

Study of the Interaction of Yeast Arginyl-tRNA Synthetase with Yeast $tRNA_2^{Arg}$ and $tRNA_3^{Arg}$ by Partial Digestions with Cobra Venom Ribonuclease
J. Gangloff, R. Jaozara, and G. Dirheimer 629–637

Protein Chemistry and Structure

Stability of the Ca^{2+}-Specific and Ca^{2+}-Mg^{2+} Domains of Troponin C. Effect of pH
R. H. Ingraham and C. A. Swenson 85–88

The Active Site of Ribonuclease A from the Crystallographic Studies of Ribonuclease-A-Inhibitor Complexes
N. Borkakoti 89–94

Two Homologous Cytochromes b_5 in a Single Cell
F. Lederer, R. Ghrir, B. Guiard, S. Cortial, and A. Ito 95–102

Low-Molecular-Weight Polypeptides of Vicilin from *Vicia faba* L. are Products of Proteolytic Breakdown
G. Scholz, R. Manteuffel, K. Müntz, and A. Rudolph 103–107

Partial Purification and Characterisation of an Acetylcholine Receptor with Nicotinic Properties from the Supraoesophageal Ganglion of the Locust (*Schistocerca gregaria*)
M. T. Filbin, G. G. Lunt, and J. F. Donnellan 151–156

Structure-Activity Relationships for Binding and Inactivation of Rabbit Reticulocyte Ribosomes by Quassinoid Antineoplastic Agents
R. T. Considine, W. Willingham, Jr, S. G. Chaney, S. Wyrick, I. H. Hall, and K.-H. Lee 157–163

Dopamine β-Monooxygenase. Binding to Apoenzyme and Rapid Exchange in Holoenzyme of ^{64}Cu Studied with High-Performance Size-Exclusion Gel Chromatography
T. Skotland and T. Flatmark 171–175

Chemical Modification of Lys-6 in Phospholipase A_2 from *Naja melanoleuca* Snake Venom
J. H. van Eijk, H. M. Verheij, and G. H. de Haas 177–182

FAD Analogues as Mechanistic and 'Binding-Domain' Probes of Spinach Ferredoxin-$NADP^+$ Reductase
G. Zanetti, V. Massey, and B. Curti 201–205

Evidence for Homologous Repeating Segments within the Elementary Polypeptide Chain of Guinea Pig Thyroglobulin
G. Palumbo, M. F. Tecce, and S. Formisano 215–218

Identification of the Thiol Groups in Human Ceruloplasmin
L. Rydén and D. Eaker 241–247

Monosaccharides Bound to Hemoglobins in Normal and Diabetic Individuals. Evidence for Glucose, Mannose and Galactose as Sugars Released by Methanolysis of the Different Hemoglobin Components
R. Krishnamoorthy, A. Cahour, J. Elion, L. Hartmann, and D. Labie 345–350

Studies of Amino-Acid Sequence in Dihydrofolate Reductase from a Human Methotrexate-Resistant Cell Line KB/6b. Structural and Kinetic Comparison with Mouse L1210 Enzyme
Y.-C. E. Pan, B. A. Domin, S. S.-L. Li, and Y.-C. Cheng 351–359

The Amino Acid Sequence of the Tyrosyl-tRNA Synthetase from *Bacillus stearothermophilus*
G. Winter, G. L. E. Koch, B. S. Hartley, and D. G. Barker 383–387

Identification of the Lipid-Binding Site of Phosphatidylcholine-Transfer Protein with Phosphatidylcholine Analogs Containing Photoactivable Carbene Precursors
J. Westerman, K. W. A. Wirtz, T. Berkhout, L. L. M. van Deenen, R. Radhakrishnan, and H. G. Khorana 441–449

Magnetic and Spectral Properties of Carp Carbonmonoxyhemoglobin. Competitive Effects of Chloride Ions and Inositol Hexakisphosphate
M. Cerdonio, S. Morante, S. Vitale, C. Dalvit, I. M. Russu, C. Ho, A. De Young, and R. W. Noble 461–467

Molecular Interactions in Intermediate-Sized Filaments Revealed by Chemical Cross-Linking. Heteropolymers of Vimentin and Glial Filament Protein in Cultured Human Glioma Cells
R. A. Quinlan and W. W. Franke 477–484

Amino-Acid Sequence of Feather Keratin from Fowl
K.-M. Arai, R. Takahashi, Y. Yokote, and K. Akahane 501–507

Structural Studies on Rat Prostatic Binding Protein. The Primary Structure of Component C_2 from Subunit S
B. Peeters, W. Heyns, J. Mous, and W. Rombauts 669–679

Purification and Characterization of a Melanoma Cell Plasminogen Activator
P. Wallén, G. Pohl, N. Bergsdorf, M. Rånby, T. Ny, and H. Jörnvall 681–686

Enzymology

Purification and Characterization of the Brain Calmodulin-Dependent Protein Kinase (Kinase II), Which Is Involved in the Activation of Tryptophan 5-Monooxygenase
T. Yamauchi and H. Fujisawa 15– 21

Solubilization and Partial Characterization of Alkylglycerol Monooxygenase from Rat Liver Microsomes
T. Ishibashi and Y. Imai 23– 27

Baker's Yeast Adenylate Kinase. Evidence of Conformational Change from Intrinsic Fluorescence and Difference Spectra. Determination of the Structure of Enzyme-Bound Metal-Nucleotide by Use of Phosphorothioate Analogues of ATP
A. G. Tomasselli and L. H. Noda 109–115

The Stereochemical Course of Nucleotidyl Transfer Catalysed by NAD Pyrophosphorylase
G. Lowe and G. Tansley 117–120

Structure of Horseradish Peroxidase Compound I. Kinetic Evidence for the Incorporation of One Oxygen Atom from the Oxidizing Substrate into the Enzyme
S. A. Adediran and H. B. Dunford 147–150

Interaction of Phospholipase A_2 from *Naja melanoleuca* Snake Venom with Monomeric Substrate Analogs. Activation of the Enzyme by Protein-Protein or Lipid-Protein Interactions?
J. H. van Eijk, H. M. Verheij, R. Dijkman, and G. H. de Haas 183–188

Gramicidin S Synthetase. Stability of Reactive Thioester Intermediates and Formation of 3-Amino-2-piperidone
A. Gadow, J. Vater, W. Schlumbohm, Z. Palacz, J. Salnikow, and H. Kleinkauf 229–234

The Protein Phosphatases Involved in Cellular Regulation. 1. Classification and Substrate Specificities
T. S. Ingebritsen and P. Cohen 255–261

The Protein Phosphatases Involved in Cellular Regulation. 2. Glycogen Metabolism
T. S. Ingebritsen, J. G. Foulkes, and P. Cohen 263–274

The Protein Phosphatases Involved in Cellular Regulation. 3. Fatty Acid Synthesis, Cholesterol Synthesis and Glycolysis/Gluconeogenesis
T. S. Ingebritsen, J. Blair, P. Guy, L. Witters, and D. G. Hardie 275–281

The Protein Phosphatases Involved in Cellular Regulation. 4. Classification of Two Homogeneous Myosin Light Chain Phosphatases from Smooth Muscle as Protein Phosphatase-$2A_1$ and 2C, and a Homogeneous Protein Phosphatase from Reticulocytes Active on Protein Synthesis Initiation Factor eIF-2 as Protein Phosphatase-$2A_2$
M. D. Pato, R. S. Adelstein, D. Crouch, B. Safer, T. S. Ingebritsen, and P. Cohen 283–287

The Protein Phosphatases Involved in Cellular Regulation. 5. Purification and Properties of a Ca^{2+}/Calmodulin-Dependent Protein Phosphatase (2B) from Rabbit Skeletal Muscle
A. A. Stewart, T. S. Ingebritsen, and P. Cohen 289–295

The Protein Phosphatases Involved in Cellular Regulation. 6. Measurement of Type-1 and Type-2 Protein Phosphatases in Extracts of Mammalian Tissues; an Assessment of Their Physiological Roles
T. S. Ingebritsen, A. A. Stewart, and P. Cohen 297–307

A Kinetic Analysis of the Effects of Inhibitor-1 and Inhibitor-2 on the Activity of Protein Phosphatase-1
J. G. Foulkes, S. J. Strada, P. J. F. Henderson, and P. Cohen 309–313

Steady-State Kinetics of Coupled Two-Enzyme Reactor with Recycling of Poly(ethylene glycol)-Bound NAD
N. Katayama, I. Urabe, and H. Okada 403–409

An Aspartic Proteinase from *Fusarium moniliforme*. Purification and General Properties
M. K. Kołaczkowska, M. Wieczorek, and A. Polanowski 557–561

Purification and Characterization of a Secreted Protease from *Tetrahymena pyriformis*
Y. Banno, K. Yano, and Y. Nozawa 563–568

Hydrolysis of Mixed Monomolecular Films of Phosphatidylcholine/Triacylglycerol by Pancreatic Phospholipase A_2
G. Pieroni and R. Verger 639–644

Lipid Dependence of Diacylglycerol Kinase from *Escherichia coli*
E. Bohnenberger and H. Sandermann, Jr 645–650

Purification and Properties of Aryl Acylamidase from *Pseudomonas fluorescens* ATCC 39004
P. M. Hammond, C. P. Price, and M. D. Scawen 651–655

Identification of Monkey Lung Procathepsin D-II as a Pepsinogen-C-Like Acid Protease Zymogen
A. Moriyama, T. Kageyama, and K. Takahashi 687–692

Carbohydrates, Lipids and Other Natural Products

Two α-3-D-Galactosyltransferases in Rabbit Stomach Mucosa with Different Acceptor Substrate Specificities
A. Betteridge and W. M. Watkins 29– 35

Structure of Teichoic-Acid–Glycopeptide Complexes from Cell Walls of *Bacillus cereus* AHU 1030
Y. Sasaki, Y. Araki, and E. Ito 207–213

Structure of the Core Oligosaccharide from the Lipopolysaccharide of *Pseudomonas aeruginosa* PAC1R and Its Defective Mutants
P. S. N. Rowe and P. M. Meadow 329–337

Primary Structure of Three Mannosyl-glycoasparagines and Nine Sialyl-oligosaccharides Isolated from the Urine of Two Patients with Gaucher's Disease (Infantile Form)
J.-C. Michalski, J. Montreuil, G. Strecker, H. van Halbeek, L. Dorland, J. F. G. Vliegenthart, B. Cartigny, and J.-P. Farriaux 375–381

Purification and Characterization of a β-*N*-Acetylglucosaminidase from *Octopus vulgaris*. Determination of Specificity by Using 360-MHz ^{1}H-NMR Spectroscopy
C. Ceccarini, A. D'Aniello, M. G. Cacace, and P. H. Atkinson 469–476

Physical Biochemistry

Studies on the Mechanism of Action of the Histone Kinase Dependent on Adenosine 3',5'-Monophosphate. Investigation of Protein-Protein Interaction by Electron Spin-Resonance Spectroscopy and Stopped-Flow Methods
A. G. Gabibov, S. N. Kochetkov, L. P. Sashchenko, I. V. Smirnov, V. P. Timofeev, and E. S. Severin 339–344

A Quantitative Description of Microtubule Formation in the Presence of Tubulin-Colchicine
A. Lambeir and Y. Engelborghs 369–373

Metal-Ion-Promoted Dephosphorylation of the 5'-Triphosphates of Uridine and Thymidine, and a Comparison with the Reactivity in the Corresponding Cytidine and Adenosine Nucleotide Systems
H. Sigel and F. Hofstetter 569–577

Membranes and Bioenergetics

Fast Ionic Flux Activated by Cyclic GMP in the Membrane of Cattle Rod Outer Segments
A. Caretta and A. Cavaggioni 1– 8

Inactivation of the Calcium-Transport ATPase in the Sarcoplasmic Reticulum by the Combined Effect of Lasolocid and Triton X-100
W. Hasselbach, H. Lüdi, and A. Migala 9– 13

An Electron Microscopic Approach to the Quaternary Structure of Mitochondrial F_1-ATPase
H. Tiedge, G. Schäfer, and F. Mayer 37– 45

Binding of MgATP to the Nitrogenase Proteins from *Azotobacter vinelandii*
J. Cordewener, H. Haaker, and C. Veeger 47– 54

Membrane Topology of ATP Synthase from Bovine Heart Mitochondria and *Escherichia coli*
C. Montecucco, F. Dabbeni-Sala, P. Friedl, and Y. M. Galante 189–194

On the Interrelation between Calmodulin and EGTA in the Regulation of the Affinity to Ca^{2+} and the Maximal Activity of the Erythrocyte-Membrane Calcium Pump
S. N. Orlov, N. I. Pokudin, M. B. Reznikova, G. G. Rjazhsky, and Y. V. Postnov 315–319

Reconstitution of the Ubiquinol: Cytochrome *c* Reductase from a bc_1 Subcomplex and the 'Rieske' Iron-Sulfur Protein Isolated by a New Method
W. D. Engel, C. Michalski, and G. von Jagow 395–402

Characterisation of Membrane Vesicles from *Paracoccus denitrificans* and Measurements of the Effect of Partial Uncoupling on Their Thermodynamics of Oxidative Phosphorylation
J. E. G. McCarthy and S. J. Ferguson 417–424

The Effects of Partial Uncoupling upon the Kinetics of ATP Synthesis by Vesicles from *Paracoccus denitrificans* and by Bovine Heart Submitochondrial Particles. Implications for the Mechanism of the Proton-Translocating ATP Synthase
J. E. G. McCarthy and S. J. Ferguson 425–431

Release of Cell-Associated Concanavalin A by Methyl α-D-Mannopyranoside Reveals Three Binding States of Concanavalin-A Receptors on Mouse Fibroblasts
K. Kammer and M. M. Burger 433–439

The Regulation of the $Na^+ - Ca^{2+}$ Exchanger of Heart Sarcolemma
P. Caroni and E. Carafoli 451–460

Chemical-Modification Studies on Rat Olfactory Mucosa Using a Thiol-Specific Reagent and Enzymatic Iodination
S. Shirley, E. Polak, and G. H. Dodd 485–494

Lipid Domains in Plasma Membranes from Rat Liver
F. Schroeder 509–516

Calcium Modulates Fatty Acid Dynamics in Rat Liver Plasma Membranes
F. Schroeder and C. Soler-Argilaga 517–524

Phosphorylated Intermediate of a Transport ATPase and Activity of Protein Kinase in Membranes from Corn Roots
R. Scalla, A. Amory, J. Rigaud, and A. Goffeau 525–530

Characterization of Phospho*enol*pyruvate Transport across the Erythrocyte Membrane. Evidence for Involvement of Band 3 in the Transport System
N. Hamasaki, H. Matsuyama, and C. Hirota-Chigita 531–536

Purification and Characterization of a New Sodium-Transport Decarboxylase. Methylmalonyl-CoA Decarboxylase from *Veillonella alcalescens*
W. Hilpert and P. Dimroth 579–587

Succinate Dehydrogenase Mutants of *Bacillus subtilis* Lacking Covalently Bound Flavin in the Flavoprotein Subunit
L. Hederstedt 589–593

Chemical Modification of the Mitochondrial bc_1 Complex by *N,N'*-Dicyclohexylcarbodiimide Inhibits Proton Translocation
B. D. Price and M. D. Brand 595–601

Site-Directed Fluorogenic Modification of Bacteriorhodopsin by 7-Chloro-4-nitrobenz-2-oxa-1,3-diazole
P. R. Allegrini, H. Sigrist, J. Schaller, and P. Zahler 603–608

Cellular Biochemistry and Metabolism

Regulation of Photosynthetic Carbon Metabolism. The Effect of Inorganic Phosphate on Stromal Sedoheptulose-1,7-Bisphosphatase
I. E. Woodrow, D. J. Murphy, and D. A. Walker 121–123

Determination of the Turn-Off Reaction for the Epinephrine-Inhibited Human Platelet Adenylate Cyclase
K. H. Jakobs 125–130

Binding of Photobilirubin to Human Serum Albumin. Estimate of the Affinity Constant
A. A. Lamola, J. Flores, and W. E. Blumberg 165–169

Defective Binding of 3-Methylcholanthrene to the *Ah* Receptor within C3H/10T1/2 Clone 8 Mouse Fibroblasts in Culture
A. B. Okey, M. E. Mason, E. B. Gehly, C. Heidelberger, J. Muncan, and M. J. Dufresne 219–227

Isolation and Partial Characterization of Three Histone-Specific Acetyltransferases from *Artemia*
I. Estepa and A. Pestaña 249–254

Destruction of Phospholipids and Respiratory-Chain Activity in Pig-Heart Submitochondrial Particles Induced by an Adriamycin-Iron Complex
E. J. F. Demant and P. K. Jensen 551–556

Regulation of Citrate Efflux from Mitochondria of Oleaginous and Non-Oleaginous Yeasts by Adenine Nucleotides
C. T. Evans, A. H. Scragg, and C. Ratledge 609–615

Regulation of Citrate Efflux from Mitochondria of Oleaginous and Non-Oleaginous Yeasts by Long-Chain Fatty Acyl-CoA Esters
C. T. Evans, A. H. Scragg, and C. Ratledge 617–622

A New Myofibrillar Protein Characteristic of Type I Human Skeletal Muscle Fibres
C. W. Heizmann, M. R. Celio, and R. Billeter 657–662

Developmental Biochemistry and Immunology

Post-Translational Fate of Variant MOPC 315 λ Chains in Xenopus Oocytes and Mouse Myeloma Cells
G. Valle, J. Besley, A. R. Williamson, T. R. Mosmann, and A. Colman 131–138

Control of the Activity of Phospho*enol*pyruvate Carboxykinase and the Level of Its mRNA in Livers of Newborn Rats. Effect of Diabetes, Glucose Load and Glucocorticoids
N. Benvenisty, E. B. Simchon, H. Cohen, D. Mencher, O. Meyuhas, and L. Reshef 663–668

Indexed in Current Contents
